

Meet our CHIP Clinical Team

Hematologists

Jun Choi, MD

Dr. Jun Choi is a Clinical Assistant Professor in the Department of Medicine at NYU Grossman School of Medicine and a hematologist oncologist with a specialization in leukemias, myelodysplastic syndrome, and myeloproliferative disorders.

Bonnie Kiner-Strachan, MD

Dr. Bonnie Kiner-Strachan is an Assistant Professor in the Department of Medicine at the NYU Grossman Long Island School of Medicine and the Director of the Clinical Leukemia Program at NYU Langone Hospital - Long Island. Dr. Kiner specializes in treating acute leukemia and lymphoma and is experienced in managing other complex diseases.

Cardiologists

Jeffrey Berger, MD

Dr. Jeffrey Berger is an Associate Professor of Medicine and Surgery at the NYU Grossman School of Medicine and Director of the *Center for the Prevention of Cardiovascular Disease*. As a physician-scientist, Dr. Berger has a particular interest in understanding the impact of novel and traditional risk factors on the development and progression of heart disease. His laboratory focuses on the role of platelets and other blood-clotting proteins that play a role in cardiovascular disease and applies his evidence-based findings to patient care.

Jonathan Newman, MD

Dr. Jonathan Newman is an Assistant Professor for the Department of Medicine at NYU Grossman School of Medicine and the Clinical Research Director for the *Center for the Prevention of Cardiovascular Disease*. As a physician-scientist, Dr. Newman is interested in using precision medicine to treat and prevent heart disease, as well as understanding how lifestyle and environmental exposures contribute to heart disease.

Swathi Bolneni, PA

Swathi Bolneni, PA-C earned her Master of Health Science degree from Duke University and her Bachelor of Science degree in biology from Northeastern University. She trained broadly in both acute and preventative medicine and has worked as a physician assistant for several years in the outpatient cardiology setting. It was during this time that she developed a lifelong interest in the prevention of heart disease. As a member of the preventive cardiology team at NYU Langone Health, she collaborates closely with her patients to modify their lifestyles and reduce their risk for cardiovascular disease.

Nephrologist

David Charytan, MD

Dr. Charytan is a Norman S. Wikler Professor of Medicine and Director of the Division of Nephrology. Dr. Charytan treats patients with kidney disease and has expertise in caring for patients with lupus erythematosus and other autoimmune kidney diseases, diabetic neuropathy, and cardiorenal disease. Dr. Charytan's research interests include the cause and treatment of cardiovascular disease in patients with chronic kidney disease.
